YOU SHOULD CONSIDER CAREFULLY WHETHER THE CALL WARRANTS ARE SUITABLE FOR YOU TAKING INTO ACCOUNT YOUR EXPERIENCE, OBJECTIVES, FINANCIAL POSITION AND OTHER RELEVANT CIRCUMSTANCES. YOU SHOULD POSSESS ADEQUATE KNOWLEDGE OF THE CALL WARRANTS BEFORE INVESTING.

2.1 No warranty of thorough investigation on FBMKLCI

We make no warranty to have conducted comprehensive and exhaustive research or investigation on the prospects of FBMKLCI. Therefore, you should not assume that the issuance of Call Warrants represents a recommendation by us to invest in the constituents of the FBMKLCI.

In addition, you should be aware that FTSE or the companies constituting the FBMKLCI has not participated in the preparation of the Base Prospectus, the First Supplementary Base Prospectus and this Term Sheet, or in establishing the Terms. As a consequence, there can be no assurance that all events occurring before the date of this Term Sheet that would affect the level of the FBMKLCI or the share price of the companies constituting the FBMKLCI (and therefore the price of the Call Warrants) have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning the FBMKLCI or the companies constituting the FBMKLCI could affect the level of the FBMKLCI and therefore the trading price of the Call Warrants. Further, neither FTSE nor the companies constituting the FBMKLCI has/have any obligation with respect to the settlement amount to be paid to you (if any) upon exercise of the Call Warrants, including any obligation to take into account, for any reason, our needs, or your needs.

2.2 Value of Call Warrants may be affected by inherent risk of FBMKLCI

The FBMKLCI represents the top 30 companies by market capitalisation on the Main Market of Bursa Securities that pass the relevant investability screens. It is the headline index of the FTSE Bursa Malaysia Index Series.

An updated list of the companies constituting the FBMKLCI is available at <https://www.ftserussell.com/analytics/factsheets/home/constituentsweights>.

2. RISK FACTORS (Cont'd)

demand factors. Accordingly, on the expiry date, if the cash settlement amount is zero or negative, you will lose the value of your investment.

2.4 The Base Prospectus, the First Supplementary Base Prospectus and Term Sheet are not the sole basis for making an investment decision

The Base Prospectus, the First Supplementary Base Prospectus and this Term Sheet do not take into account your investment objectives, financial situation or particular needs. Nothing in the Base Prospectus, the First Supplementary Base Prospectus and this Term Sheet should be construed as a recommendation by us or our affiliates to invest in the Call Warrants or FBMKLCI.

2.5 Adjustment related risks

The occurrence of certain events (including modification and cessation of calculation of the FBMKLCI and replacement of FTSE by a successor) may entitle us to adjust the Terms of the Call Warrants. However, we are not obliged to adjust the Terms of the Call Warrants for every event that affects the FBMKLCI. Any adjustment or decision not to make any adjustment may adversely affect the value of the Call Warrants.

2.6 Calculation Methodology

FTSE uses the real time and closing prices sourced from Bursa Securities to calculate the FBMKLCI. Calculation is based on a value weighted formula and adjusted by a free float factor. The FBMKLCI values are calculated and disseminated on a real time basis every 15 seconds.

Details of the calculation methodology can be found at https://research.ftserussell.com/products/downloads/FTSE_Bursa_Malaysia_Index_Series.pdf.

2.7 Risks related to the Covid-19 pandemic

The outbreak of the Covid-19 pandemic has had, and continues to have, significant economic ramifications, such as contractions in economic growth rates across the world. The slowdown in global and domestic consumption due to the implementation of movement restrictions and lockdowns may adversely affect the performance of FBMKLCI and consequently affect the performance of the Structured Warrants.

Should the Covid-19 outbreak continue to cause disruptions to global and domestic economic activity, KIBB Group's financial position may be adversely impacted. Prolonged and material impact on KIBB Group's financial position may also cause a downward rating in KIBB Group credit rating profile, which could in turn affect the ability to meet our financial commitments as a Structured Warrants issuer.

In order to assess the severity of the Covid-19 pandemic, KIBB Group is actively monitoring and evaluating this fluid situation and shall take any additional actions as necessary. KIBB Group has also taken reasonable steps to prevent any severe communicable disease, such as Covid-19 pandemic, from significantly affecting its operational performance and financial position.

3. SUPPLEMENTAL GENERAL INFORMATION

3.1 Basis of arriving at the issue price

The issue price of the Call Warrants of RM0.150 was based on an option pricing model which takes into account the Exercise Level of the Call Warrants, volatility of FBMKLCI, tenure of the Call Warrants and interest rates.

3.2 Details on use of gross proceeds

We will use the indicative total gross proceeds arising from the Offer of up to RM5.25 million, based on the issue price of RM0.150, in the following manner:-

	Note	RM
Working capital	(i)	5,000,000
Estimated expenses	(ii)	250,000
Total		5,250,000

Notes:

- (i) *This amount will be utilised for our general working capital purposes during the tenure of the Call Warrants.*
- (ii) *The estimated expenses include professional fees, fees to authorities, selling fees and printing fees which will be used as and when the expenses are incurred.*
- (iii) *The financial impact of the Offer on our earnings depends on certain factors including, but not limited to, the level of FBMKLCI as well as the costs relating to risk management i.e. hedging and its associated costs.*

3.3 Break-even analysis

Warrantheolders may calculate the break-even level of their investments in the Call Warrants as follows:

$$\text{Break-even level} = \text{Exercise Level} + \left(\frac{(\text{Purchase Cost}^{(i)} \times \text{Exercise Ratio}) + \text{Exercise Expenses}^{(ii)}}{\text{Index Currency Amount}} \right)$$

Notes:

- (i) *This is the amount a Warrantheolder pays for every unit of Call Warrant in the primary or secondary market, including where relevant transaction costs such as brokerage fees, clearing fees and stamp duty.*
- (ii) *The Exercise Expenses will be borne by KIBB unless affected by the occurrence of a settlement disruption event.*

Warrantheolders will obtain positive gain only if the level of FBMKLCI exceeds the break-even level upon exercise of the Call Warrants.

3. SUPPLEMENTAL GENERAL INFORMATION (Cont'd)

3.4 Further Issue

The Deed Poll allows KIBB to create and issue further Structured Warrants in respect of the same series of Structured Warrants under the Base Prospectus and the First Supplementary Base Prospectus (“**Further Issue**”) without the consent or sanction of the existing Warrantheolders. The Further Issue will form part of the existing Structured Warrants in issue (“**Existing Issue**”).

For the purpose of facilitating Market Making, KIBB may apply for a Further Issue in respect of the Structured Warrants subject to the following conditions:

- (i) the Further Issue is for the purpose of facilitating Market Making;
- (ii) the terms and conditions of the Existing Issue either permit the Further Issue or have been properly amended to give us the right to issue and list one or more Further Issues;
- (iii) the terms and conditions of the Further Issue and the Existing Issue must be identical except for the size and tenure of the issue; and
- (iv) the Issuer holds not more than 50% of the Existing Issue at the time of application for the Further Issue.

3.5 Liquidity provision

We will be acting as the liquidity provider for the trading of the Call Warrants on Bursa Securities. The process of Market Making is set out in Section 5 of the Base Prospectus.

As an Issuer, it is our business policy to stand by our products by providing liquidity. As stipulated by Bursa Securities, we will maintain a minimum market presence of 70% of trading hours on each day that Bursa Securities is open for trading and a maximum spread between bid and offer prices of twenty-five (25) bids.

The process of providing liquidity involves maintaining bid and offer prices on the trading system of Bursa Securities on each Market Day, over the life of the Call Warrants. Although we endeavour to provide liquidity for the Call Warrants on Bursa Securities, the level of liquidity will depend on competitive forces and the price at which the Call Warrants will trade on Bursa Securities upon or subsequent to its listing. Besides the supply and demand for the Call Warrants in the secondary market, there are other factors affecting the price of the Call Warrants such as, without limitation, the underlying unit price, intrinsic value, dividend expectations, expected volatility, prevailing interest rates and the time left to the expiry of the Call Warrants.

As the liquidity provider, we would need to maintain a certain number of Call Warrants as inventory for the purposes of liquidity provision during the tenure of the Call Warrants. The minimum quantity of Call Warrants for which liquidity will be provided is ten (10) board lots (1,000 units of Call Warrants). We may during the tenure of the Base Prospectus and the First Supplementary Base Prospectus issue additional Call Warrants in a particular series subject to the approval of Bursa Securities.

However, you should note that there would be circumstances under which we are unable and could not be obliged to provide liquidity, due to reasons beyond our control. Such circumstances are set out in Section 5.2 of the Base Prospectus.

You may obtain bid/offer prices for the Call Warrants (in respect of prices that appear on the trading system of Bursa Securities, and/or in respect of direct business transactions) from us at the following contact details:-
